Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 7, 8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Daum et al. (US Patent Publication Number 2003/0040753).

Daum et al. disclose various embodiments of a navigation tool comprising a column member comprising upper part, e.g. 210, and a lower part, e.g. 201, the upper part having a mating surface at its lower end and the lower part having a mating surface at its upper end, the upper and lower parts being connected to one another with the mating surfaces in contact with one another, a guide comprising a plate, e.g. 205, having an opening extending through it, which is fastened, via 211 and 212, to the upper part of the column member so that it extends transversely relative to the upper part of the column, wherein the plate has at least first and second openings, e.g. 206 and 207, extending through it, the distance from the point at which the plate is fastened to the upper part of the column member to the first opening being greater than the distance from the point at which the plate is fastened to the upper part of the column

Art Unit: 3733

member to the second opening, wherein the plate has a plurality of openings extending through it, arranged on a helical line around the point at which the plate is fastened to the upper part of the column member, in which the guide can be rotated relative to the upper part of the column member, about the point at which the guide is fastened to the upper part of the column member, wherein the tool includes a connector, e.g. 215, a marker, e.g. 202 and 211.

With regard to the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Daum et al., which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daum et al. (US Patent Publication Number 2003/0040753).

Daum et al. disclose the claimed invention except the tool including a motor. Daum et al. teach the use of a drill (see paragraph 0039). Thus, it would have been obvious to one of ordinary skill in the art for the tool of Daum et al. to include a motor, via the drill, since Daum et al. disclose the use of a drill. Regarding claim 11, as previously stated, since Daum et al. disclose the use of a drill, i.e. a cutting tool, (see paragraph 39), it would have been obvious to one of ordinary skill in the art for the device of Daum et al. to include a cutting tool.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for art cited of interest.
